Healthy Youth Survey 2006 Survey Results

Statewide Results, Grade 8

Number of students surveyed: 9297
Number of valid responses: 8912
Estimate of enrolled students:* 13401
Survey participation rate:** 67 %

Introduction and Overview

The impact of adolescent health risk behaviors remains a primary concern of citizens throughout the country. Many health problems experienced by adolescents are caused by a very few preventable behaviors. Patterns of alcohol, tobacco, and other drug (ATOD) use and related risk behaviors are often formed during adolescence. These patterns play an important role in health throughout adulthood.

This report presents results from the fall 2006 Healthy Youth Survey in Washington State. This survey was sponsored by the Office of Superintendent of Public Instruction; the Department of Health; the Department of Social and Health Services; the Department of Community, Trade and Economic Development; and the Family Policy Council, in cooperation with schools throughout the state of Washington.

For each item, local results appear in the first two columns and statewide results appear in the second two columns. The number of valid responses ("n") appears in parentheses for each item. Survey items covering the same topics are grouped together (the item numbering is specific to this report and does not necessarily reflect the item order on the actual survey). The bulleted points and graphs included at the beginning of this report highlight selected findings. Additional information may be found in the *Interpretive Guide* posted to the Healthy Youth Survey web site (http://www.hys.wa.gov/).

Survey participation rates can be found on the Healthy Youth Survey web site. The following guidance from DOH may be used when reviewing your results. However, if a particular group(s) of students did not complete the survey and therefore did not contribute to your results, there may be limitations to your results even if you have a high participation rate (i.e., if differences exist between students who *did* and who *did not* complete the survey). There may be value in discussing the potential limitations when using the results in this report.

- 70% or greater participation Results are probably representative of students in this grade.
- 40-69% participation Results may be representative of students in this grade.
- Less than 40% participation Results are likely not representative of students in this grade but do reflect students who completed the survey.

Key to the Notes

The survey was administered in 3 versions. Forms A and B were administered to students in Grades 8, 10, and 12. These two forms contained a core set of common items (see "List of Core Items" on the last page of this report) and additional items unique to each form. Form C was administered to students in Grade 6. This form consisted primarily of items drawn from Forms A and B but also included some unique items. Several items on each form were optional at the discretion of the school; schools that did not administer the optional items tore off the last page of the survey booklet. The following notes are used throughout this report to document the differences between the items on different versions and indicate the optional items:

A =wording on Form A

B = wording on Form B

C =wording on Form C

† = optional item

^{*} Estimate of enrolled students based on 2004–2005 figures from OSPI (or later if not available for that period).

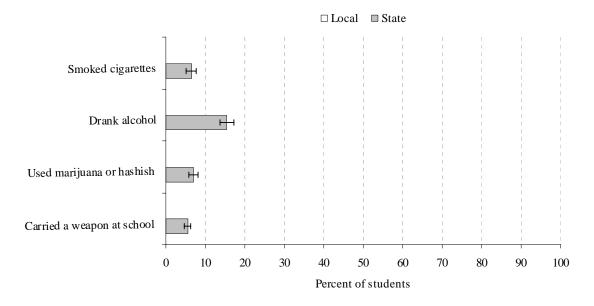

^{**} Participation rate = valid responses ÷ enrolled students (may be >100% if enrollment greater in 2006 than 2004).

Highlights of the Local Results

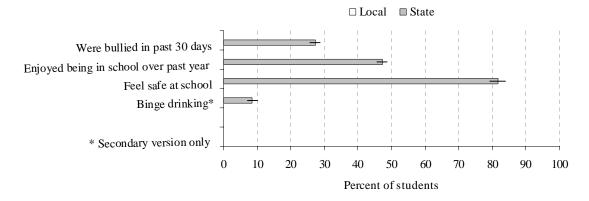

Students statewide reported the following behaviors and attitudes:

		States	wide
•	Smoking cigarettes in the past 30 days (see item 28).	6.4%	$(\pm 1.2\%)$
•	Drinking alcohol in the past 30 days (see item 34).	15.4	(± 1.8)
•	Using marijuana or hashish in the past 30 days (see item 35).	7.0	(± 1.2)
•	Carrying a weapon at school in the past 30 days (see item 112, 113).	5.5	(± 0.8)
•	Being bullied in the past 30 days (see item 132).	27.2	(± 1.6)
•	Enjoyed being in school over the past year (see item 194).	47.2	(± 1.6)
	Feeling safe at school (see item 205).	81.6	(± 2.4)

Substance Use and Weapon Carrying in the Past 30 Days

Bullying and School Climate

Selected Results by Gender

Selected items are presented by gender to highlight any differences between females and males. The p-values reported after each item can be used to examine whether differences in the local data between females and males are statistically significant. To ensure student anonymity, local results are suppressed for each item on this page if any cell (e.g., females who reported smoking) represented fewer than 15 students.

During the past 30 days, on how many days did you smoke cigarettes? (See item 28.) None 1 or more	State $(n = 8,6)$ Female 93.2% 6.8	
During the past 30 days, on how many days did you drink a glass, can or bottle of alcohol (beer, wine, wine coolers, hard liquor)? (See item 34.) None 1 or more	State (n = 8,6) Female 82.9% 17.1	
Think back over the last 2 weeks. How many times have you had five or more drinks in a row? (A drink is a glass of wine, a bottle of beer, a shot glass of liquor, or a mixed drink.) (See item 65.) None Once or more	State (n = 4,1) Female 90.3% 9.7	
During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities? (See item 122.) No Yes	State (n = 8,2) Female 69.6% 30.4	
In the last 30 days, how often have you been bullied? (See item 132.) I have not been bullied Once or more	State (n = 8,2) Female 72.6% 27.4	
I feel safe at my school. (See item 205.) No Yes	State (n = 8,7) Female 16.1% 83.9

	e. I was not honest at all	Surveys pulled	

Alcohol, Tobacco, and Other Drug Use

Alcohol, tobacco, and other drug use has been a major concern in this country for many years. The consequences of ATOD use are well known. In the short term, ATOD use interferes with positive physical, emotional, and social development. In the long term, ATOD use is associated with delinquency and criminal activity, unintended injuries, and a variety of health complications including shorter life expectancy. The economic costs of ATOD use are enormous (in Washington State an estimated \$1.81 billion in 1990 and \$2.54 billion in 1996). Tobacco use is the world's leading cause of preventable death, disease, and disability. This section provides information about lifetime ATOD use (which in part reflects experimental use), use in the past 30 days (i.e., current use), and other tobacco-, alcohol-, and drug-related issues.

Lifetime Use

15. Have you ever smoked a cigarette, even just a puff?	State	
	(Computed from item 213.)	(n = 4,159)
	a. No	$80.2\% (\pm 2.7\%)$
	b. Yes	19.8 (± 2.7)

16.	Have you ever smoked a whole cigarette? (Computed from item 46 or 47.) a. No b. Yes	Sta (n = 8, 87.3% 12.7	
17.	Have you ever had more than a sip or two of beer, wine, or hard liquor (for example, vodka, whiskey, or gin)? (Computed from item 214 or 215.) a. No b. Yes	Sta (n = 8, 62.4% 37.6	
18.	Have you ever smoked marijuana? (Computed from item 211 or 212.) a. No b. Yes	Sta (n = 8, 89.3% 10.7	
19.	Have you ever used methamphetamines (meth, crystal meth, ice, crank)? Do not include other types of amphetamines. (Computed from item 219.) a. No b. Yes	Sta (n = 4, 98.1% 1.9	123)
20.	Have you ever, even once in your life, used steroids (muscle builders) without a doctor's prescription? a. No b. Yes	Sta (n = 4, 98.1% 1.9	
21.	Have you ever used cocaine? (Computed from item 220.) a. No b. Yes	Sta (n = 4, 97.6% 2.4	
22.	Have you ever, even once in your life, used a needle to inject any illegal drug? a. No b. Yes	Sta (n = 4, 98.3% 1.7	427) (± 0.4%) (± 0.4)
23.	Have you ever used inhalants? (Computed from item 217.) a. No b. Yes	Sta (n = 4, 94.3% 5.7	
[Items	s 24 and 25 appear only on the elementary version of the survey.]		
26.	About how many cigarettes have you smoked in your entire life?† a. None b. A puff or a whole cigarette c. 2-19 cigarettes d. 20-99 cigarettes e. 100 or more cigarettes (5 or more packs)	Sta (n = 2, 80.8% 8.4 5.9 2.2 2.7	

30-Day Use (Use in the Past 30 Days)

	h. I got it some other way	2.7	(± 0.6)

Other Health Concerns

This section provides results regarding other health concerns including nutrition and fitness, health conditions and health care, safety, behaviors related to intentional injury, and depression. Proper nutrition and exercise are critical components of a healthy life, as is access to preventive health care. Safety-related behaviors, such as wearing a seat belt when in a moving vehicle, can profoundly influence the outcome of an accident. Injury is the leading cause of death for adolescents aged 10 to 19, and violence contributes to injury-related deaths. People who are depressed experience a range of symptoms, and depression is associated with suicidal behavior.

Nutrition and Fitness

68. Overweight: "Overweight" includes students who are in the top 5% for body mass index by age and gender based on growth charts developed by the Centers for Disease Control and Prevention (2000). "At risk for overweight" includes students who are in the top 15% but not the top 5%. School Climate

In the past few years Washington State has given increased attention to supportive learning environments. Students need a safe, nurturing, healthy, and civil learning environment if they are to be successful in school. This section provides information about student perceptions of school climate.

132. A student is being bullied when another student, or group of students, say or do nasty or unpleasant things to him or her. It is also bullying when a student is teased repeatedly in a way he or she doesn't like. It is NOT bullying when two students of about the same strength argue or fight. In the last 30 days, how often have you been bullied?

30 days, how often have you been bullied?	(n = 8,	,459)
a. I have not been bullied	72.8%	$(\pm 1.6\%)$
b. Once	12.4	(± 0.6)
c. 2 – 3 times	7.7	(± 0.6)
d. About once a week	2.6	(± 0.4)
e. Several times a week	4.5	(± 0.6)

State

In the past 30 days, how often were you bullied, harassed, or intimidated at school or on your way to or from school:

133.	Because of your race, ethnicity, or national origin or what someone thought it was?	Sta $(n = 4)$	
	a. 0 times	85.1%	$(\pm 1.8\%)$

	d. About once a week	2.8	(± 0.4)
		2.0	(± 0. +)
	e. Several times a week or more	5.2	(± 0.8)

139.	In the past 30 days, has someone used the computer or a cell phone to bully, harass or intimidate you? a. Yes b. No c. I'm not sure	Sta (n = 4 10.1% 83.1 6.8	
140.	Does your school provide a counselor, intervention specialist, or other school staff member for students to discuss problems with alcohol, tobacco, or other drugs? a. No b. Yes c. I'm not sure	Sta (n = 8 6.5% 77.3 16.2	,514) (± 0.6%)
141.	Last year in school, were you taught about preventing sexually transmitted diseases (STD) other than HIV or AIDS? a. Yes b. No c. I'm not sure	Sta (n = 4 76.7% 14.1 9.3	,227) (± 4.5%)
142.	Last year in school, were you taught about HIV or AIDS infection? a. Yes b. No c. I'm not sure	State $(n = 4,241)$ 81.2% $(\pm 3.9\%)$ 11.4 (± 2.7) 7.5 (± 1.4)	

Quality of Life

Health-related quality of life is an individual's or group's perceived physical and mental health over time. At the individual level it involves a person's health and health-related conditions; at the community level it involves conditions that influence people's health. This section contains the results of the items related to individual quality of life.

[Item 150 appears only on the elementary version of the survey.]

Risk and Protective Factors

Decades of research have shown that certain risk factors are associated with increased likelihood of health risk behaviors including ATOD use, violence, and delinquent behaviors. Similarly, research has shown that protective factors exert a positive influence against the negative influence of risk factors. The survey included substantial coverage of risk and protective factors based on the work of Drs. Hawkins and Catalano and associates at the University of Washington. The premise of the risk reduction and protective factor enhancement approach to prevention is that preventing a problem before it occurs requires addressing the factors that predict the problem. Ideally, this strategy entails discovering the causes of the problem behavior and influencing those causes. Many of the survey items were used to assess students' status on risk and protective factors in the community, school, and peer-individual domains. Composite scales were computed for use in local program planning.

The table on the following page provides the complete list of risk and protective factors and indicates the years the Healthy Youth Survey has included each factor.

Risk and Protective Factor Scale Results

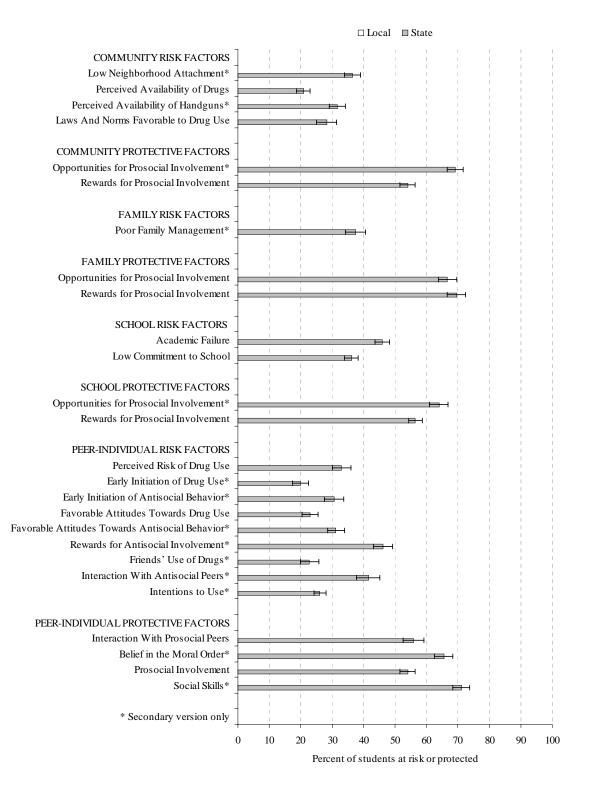

For each *risk* factor scale, the percentage of students who are at risk (i.e., who agreed with statements that predict ATOD use or other problem behaviors) is reported; higher percentages indicate that *more* students are likely to engage in problem behaviors. For each *protective* factor scale, the percentage of students who are resilient (i.e., who agreed with statements that predict the ability to resist ATOD use or other problem behaviors) is reported; higher percentages indicate that *fewer* students are likely to engage in problem behaviors. These percentages are based on computational methods provided by the University of Washington's Social Development Research Group.

Community Risk Factors	State			
Low Neighborhood Attachment (Items 151–153)	(n = 4,418) 36.6% (± 2.5%) (n = 4,361)			
Perceived Availability of Drugs (Items 154–157)	(n = 1,361) $20.9\% (\pm 2.2\%)$ (n = 4,364)			
Perceived Availability of Handguns (Items 158)	$31.6\% (\pm 2.5\%)$ $(n = 4,371)$			
Laws And Norms Favorable to Drug Use (Items 159–164)	28.2% (± 3.1%)			
Community Protective Factors	State $(n = 4,249)$			
Opportunities for Prosocial Involvement (Items 165–170)	(n = 4,249) 69.2% (± 2.5%) (n = 4,393)			
Rewards for Prosocial Involvement (Items 171–173)	54.0% (± 2.4%)

265.	It's 8:00 on a weeknight and you are about to go over to a		
	friend's house when your mom asks you where you are		
	going. You say, "Oh, just going to hang out with some		
	friends." She says, "No, you'll just get into trouble if you go	Sta	te
	out. Stay home tonight." What would you do now?	(n = 4,	,313)
	a. Leave the house anyway	6.8%	$(\pm 1.0\%)$
	b. Explain what you are going to do with your friends, tell her when you will get home, and ask if you can go out	69.7	(± 2.4)
	c. Not say anything and start watching TV	14.5	(± 1.6)
	d. Get into an argument with her	8.9	(± 1.2)
266.	You are visiting another part of town and you don't know any of the people your age there. You are walking down the street and some teenager you don't know is walking toward you. He is about your size. As he is about to pass you, he deliberately bumps into you and you almost lose your balance. What would you say or do?	Sta $(n = 4,$,293)
	a. Push the person back	12.4%	$(\pm 1.6\%)$
	b. Say nothing and keep on walking	42.3	(± 2.7)
	c. Say, "Watch where you're going," and keep on walking	30.1	(± 1.6)
	d. Swear at the person and walk away	15.2	(± 1.4)
267.	You are at a party at someone's house and one of your friends offers you a drink containing alcohol. What would	C4 o	4-
	you say or do?	Sta $(n = 4,$	
		(n - 4, 17.1%)	
	a. Drink it b. Tall your friend "No thanks. I don't drink" and suggest	40.8	$(\pm 2.2\%)$
	b. Tell your friend, "No thanks. I don't drink," and suggest that you and your friend go and do something else		(± 2.0)
	c. Just say, "No, thanks," and walk away	29.3	(± 1.6)
	d. Make up a good excuse, tell your friend you had something else to do, and leave	12.8	(± 1.2)

List of Core Items

The core items that appeared on both Forms A and B (the secondary versions of the survey) are listed below. All other items appeared on either Form A or Form B, but not both. Core items may or may not have appeared on Form C (the elementary version).

Item	Description	Item	Description
1	Age	45	Intent to smoke within the next year
3	Gender	46	Age when first smoked a cigarette
4	Race/Ethnicity	66	Drunk or high at school (past 12 months)
5	Language spoken at home	88	Participation in after school activities
7	Mother's education	112	Weapon carrying on school property (past 30 days)
8	Father's education	114	Physical fighting (past 12 months)
14	Honesty in completing survey	122	Depression (past 12 months)
28	30-day use of cigarettes	132	Been bullied (past 30 days)
29	30-day use of chewing tobacco	140	School provides counselor to discuss ATOD
34	30-day use of alcohol	155	How easy to get cigarettes
35	30-day use of marijuana or hashish	189	Grades in school (past 12 months)
36/37	30-day use of illegal drugs	194	Enjoyed being in school (past 12 months)
38	30-day use of methamphetamines	205	Feel safe at school
39	30-day use of inhalants	211	Age when first smoked marijuana
41	30-day use of pain killers	214	Age when first drank alcohol
42	30-day drunk or very high from alcohol	226	Perceived wrongness of smoking
44	Would smoke if offered cigarette by a friend
